

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

1-56. Canceled.

57. (New) A method comprising:

displaying an outline in a corner on each of a plurality of slides of a presentation created by a presentation program;

separating the outline from the remainder of each of the plurality of slides by a user configurable line;

wherein the outline is created from a title of each of the slides in the presentation;

responsive to a user selecting to expand all levels of topics of the presentation, displaying the outline expanded to all levels on each slide;

responsive to a user selecting to expand a user-configurable number of levels of the outline, displaying the outline expanded to the user-configurable number of levels on each slide; and

responsive to a user selecting to expand only a current topic of the presentation on the outline, displaying the outline expanded to only the current topic of the presentation on each slide;

responsive to a user limiting the number of lines on the outline, displaying the limited number of lines on the outline;

wherein immediately adjacent topics are displayed in any remaining lines; and

wherein the topics above the current topic are displayed, subject to the user limited number of lines, and then the immediately adjacent topics are displayed, subject to the user limited number of lines; and

responsive to a user limiting the topics on the outline, displaying only desired outline topics that are not limited by the user;

responsive to a user selection to display the topics after the current topic, not displaying previous topics on the outline; and

responsive to a user selection to display the topics before the current topic, not displaying subsequent topics on the outline.
